

Lewis Ndambiri

Industrial Engineer | Manufacturing Systems, Process Optimisation & Industrial AI

Nantes, France | +33 7 59 50 88 69 | ndambirilewis@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Availability: August 2026 | Mobility: France & International

PROFILE

Industrial engineering student in the EIT Manufacturing double-degree program focused on manufacturing systems, operations optimisation, and data-driven industrial performance. I apply data analytics, AI, and process optimisation methods to improve efficiency across operations. Curious and rigorous, I'm seeking an engineering role where I can contribute to improving industrial performance and continuous improvement initiatives.

EDUCATION

M.Sc. Data Science & AI for Competitive Manufacturing (Double Degree) 2024 – 2026

EIT Manufacturing Master School — EIT label, International Mobility, Innovation & Entrepreneurship

- Centrale Nantes — France, 2026 — M.Sc. Industrial Engineering, Smart and Connected Enterprise track.
- University of Trento — Italy, 2026 — M.Sc. Computer Science, ICT Innovation track.
- Focus: Industrial AI, Data Science, Simulation, Operations Research, Innovation and ICT Entrepreneurship.

B.Eng., Industrial Engineering 2018 – 2022

Centrale Nantes — Nantes, France (2022) — OTCex Education Partnership Scholarship

- Foundation in industrial engineering, production systems, engineering analysis, project management and applied technical problem-solving.

PROFESSIONAL EXPERIENCE

Industrial Engineering & AI Automation Intern — BLM Group, Levico Terme, Italy Since March 2026

- Designing a Python-based agentic AI system to optimise production performance by integrating data pipelines, KPI monitoring, and component traceability across 5 manufacturing stages, from customer order to delivery.
- Automating Kanban tracking to strengthen replenishment discipline, improve real-time inventory visibility and reduce operational bottlenecks.
- Standardising data collection processes across 3 departments and conducting technology assessments to develop a comprehensive AI roadmap and identify automation opportunities.

Intermodal Sales Support Intern & Planning Officer — CMA CGM, Nairobi, Kenya 07/2023 – 08/2024

- Managed end-to-end shipment readiness (bookings, vendor coordination, documentation, BLs) with 100% compliance with export procedures.
- Improved cargo space utilisation by 15% through load planning optimisation & developed Excel/VBA automation tools, improving data reliability by 20%.

Continuous Industrial Improvement Intern — Elis Group, Aix-les-Bains, France 04/2022 – 10/2022

- Led 5S implementation across linen and consumables storage areas, increasing usable warehouse space by 25%.
- Redesigned production layouts for 2 workstations in collaboration with cross-functional teams, reducing operator travel time by 30% and improving scheduling efficiency by 15% while also supporting preventive maintenance.

Early Experience

- Project Management & Site Engineering Intern, Jamisam Enterprises (Kenya, 2021) — Supervised 40+ construction workers across 3 project phases, ensuring 100% HSE compliance and delivering projects 2 weeks ahead of schedule with zero safety incidents.
- Industrial Engineering Intern, Ekium Group (Mauritius, 2019) — contributed to 5+ projects, feasibility studies, P&IDs and API 650 compliance.

DATA SCIENCE & INDUSTRIAL AI PROJECTS

Offline RAG Assistant for CNC Documentation — *Python, FAISS, Sentence Transformers, Ollama/Mistral, Streamlit*

Fully local question-answering assistant for CNC machine maintenance (Haas Mill NGC manual): 839 indexed manual chunks, source-grounded answers, 100% hit rate@5 on the evaluation set. [Case study](#)

FactoryPulse — Real-Time Industrial Monitoring & Control — *React, FastAPI, MQTT, Docker, OPC UA*

Real-time production monitoring platform (HMI): machine telemetry ingestion, OEE analytics, alarms, downtime history, audit logging. [Case study](#)

Demand Forecasting — Rossmann Store Sales — *Python, XGBoost, Pandas, Scikit-learn, Streamlit*

Forecasting pipeline across 1,115 stores and 1M+ rows: 9.23% MAPE, 0.914 R², a 55% RMSE reduction versus the naive baseline. [Case study](#)

Industrial AI Challenge — Fedrigoni (Arco Plant) — *Python, Pandas, NumPy, XGBoost, CRISP-DM*

Modelled the slitting process to anticipate daily output, shifting production planning from reactive to predictive management. [Case study](#)

KEY SKILLS

AI & Data Science

- Machine Learning (scikit-learn, XGBoost)
- RAG & local LLMs (Ollama, Mistral)
- Time-series Forecasting
- Power BI, Data Storytelling, KPIs

Manufacturing & Lean

- Lean Manufacturing, 5S, Six Sigma, OEE
- Kanban, Scheduling, Continuous Improvement
- Process Mapping, Process Optimisation, FlexSim
- Supply chain, logistics, Predictive Maintenance

Programming & Tools

- Python, SQL, VBA, C/C++
- FastAPI, Docker, MQTT
- Git/GitHub, Linux, PostgreSQL, VS code
- SAP, AutoCAD, SolidWorks, MS Project

Languages: English — C2 | Swahili — Native | French — B2 | Italian — A2
